

Any age. Any model. *Any condition.*

Send us a tired or inherited liquid-nitrogen doser and we return it inspected, rebuilt, and certified to JoyCan standards — ready to run at a fraction of the cost of a new system. Works with any make, model, or vintage.

WHAT'S INCLUDED IN EVERY REFURBISHMENT

Teardown & Inspection

Full disassembly, inspection, and cleaning of every part and sub-assembly.

Component Replacement

New tubing and cables, plus any worn or failed components.

Reassembly & Function Test

Rebuilt and validated through full function testing.

Vacuum Integrity Check

Liquid-nitrogen fill to verify vacuum integrity of insulated components.

Performance Test

Performance tested to your spec, anywhere from 100–900 CPM.

Certification Report

Full report with photos, video, and certification documentation.

\$2,950
PER UNIT

Flat program fee to restore your doser to **certified, reliable performance** — any make, model, or vintage. Any **missing parts** or components **damaged beyond repair** are identified and quoted separately before installation.

1-YEAR WARRANTY

Every refurbished doser is **re-warranted for a full year** and comes back with genuine parts and full JoyCan service support behind it.

HOW IT WORKS

- **Request a quote** — tell us the make, model, and condition; we confirm scope and price.
- **We restore, certify & return it** — line-ready, with your full refurbishment report.
- **Ship us the doser** — send the unit to our Bensalem, PA facility.
- **Beyond-repair parts** are quoted for your approval before the work is completed.

* The Doser Refurbishing Program fee is \$2,950 per unit and covers certified refurbishment: teardown, inspection and cleaning; replacement of tubing, cables, and worn or failed components; reassembly and function testing; liquid-nitrogen vacuum-integrity inspection of insulated components; performance testing to customer spec (100–900 CPM); and a full certification report with photos, video, and documentation. Any missing parts or components damaged beyond repair are identified and quoted separately for customer approval before installation. Customer is responsible for shipping the unit to and from JoyCan. The program works with any make, model, or vintage; refurbished units are certified to JoyCan standards, re-warranted for one (1) year, and backed by JoyCan service and genuine parts. This sheet is a summary - a written program agreement governs.
