

# Prove it in the lab, *before you buy.*

Send us your containers and product — our lab fills, doses, and seals them to your spec so you can validate liquid-nitrogen dosing before investing in equipment. One flat program fee covers the trial, and the full amount credits back toward the purchase of a Chart Doser from JoyCan.

## WHAT THE LAB PROGRAM IS FOR

### New Product Development

Build and validate a brand-new dosed product from concept.

### Dose an Existing Product

Test liquid-nitrogen dosing on a product you already package.

### Container Rigidity

Confirm your can or bottle holds up under dosing conditions.

### “Nitro” Product Development

Develop nitrogen-charged drinks with the right texture and pour.

### Paneling Prevention

Dial in dosing to stop container paneling and deformation.

### Oxygen Reduction

Lower headspace O<sub>2</sub> to protect flavor and extend shelf life.

**\$2,500**

PROGRAM FEE

Includes **fill / dose / seal** of your supplied containers to spec, processing of the **first 50 containers**, and all **liquid nitrogen** used in the trial. Each additional container is billed at **\$10**.

CREDIT BACK

The full **\$2,500 program fee credits toward the purchase of a Chart Doser from JoyCan.**

## HOW THE PROGRAM WORKS

- **Ship us your containers, product & consumables** — we fill, dose, and seal them to your spec.
- **\$2,500 flat program fee** covers the trial; the first 50 containers are included, additional units at \$10 each.
- **Liquid nitrogen is included** — trials run on liquid nitrogen; liquid argon can be offered at additional cost.
- **Apply the full \$2,500** as credit toward the purchase of a Chart Doser from JoyCan once you're ready to bring dosing in-house.

### JOYCAN PROVIDES

- **Fill / dose / seal** to spec
- **Liquid nitrogen**
- **First 50 units** processed
- **Lab technician** time

### CUSTOMER PROVIDES

- **Containers & product** — shipped to JoyCan
- **Consumables** — shipped to JoyCan
- **Return shipping** of finished goods
- **Fill / dose / seal spec**

\* The lab services program fee is \$2,500 and covers fill / dose / seal of customer-supplied containers to spec, processing of the first 50 containers, and the liquid nitrogen used during the trial. Additional containers are billed at \$10 each. Customer is responsible for shipping product, containers, and consumables to JoyCan and for return shipping of all finished goods. The \$2,500 program fee may be credited in full toward the purchase of a Chart Doser from JoyCan. Lab trials are performed using liquid nitrogen; liquid argon can be offered subject to additional cost. This sheet is a summary — a written program agreement governs.
